

INDEX TO VOLUME XXVIII

1952

INDEX OF SUBJECTS

Absence of lipid in pulmonary arteriolar sclerosis. (<i>Spain and Rosen-shein</i> : May-June)	525*
Acid-fast bacilli —Demonstration of . . . in tissue sections. (<i>Wade</i> : January-February)	157
ACTH —Lipid deposition in aortas in younger age groups following cortisone and adrenocorticotrophic hormone. (<i>Etheridge and Hoch-Ligeti</i> : March-April)	315
—The histology of antigenically stimulated lymph nodes in rabbits given . . . or cortisone. (<i>Craig</i> : July-August)	629
Adenocarcinoma —Incipient . . . of the stomach in peptic ulcer. Report of two cases. (<i>Yesner</i> : May-June)	571*
Adenoma —Oxyphil parathyroid adenomas. (<i>Sommers and Young</i> : July-August)	673
Adrenal gland —Destructive lesion of the . . . in South American blastomycosis (Lutz' disease). (<i>Magarinos Torres, Duarte, Guimarães, and Moreira</i> : January-February)	145
—Pathologic changes in parabiotic rats after hemi-adrenalectomy and x-radiation. (<i>Edwards and Sommers</i> : May-June)	545*
Agnesia —The nature of agnesia and deficiency of parts. The influence of intrinsic factors in disease when development of the body is abnormal, as illustrated by agnesia of the digits, facial hemi-atrophy, and cerebral agyria and microgyria. (<i>Inglis</i> : May-June)	449
Aging processes in the arterial and venous systems of the lower extremity. (<i>Pereira, Handler, and Blumenthal</i> : May-June)	525*
Agyria —The nature of agnesia and deficiency of parts. The influence of intrinsic factors in disease when development of the body is abnormal, as illustrated by agnesia of the digits, facial hemi-atrophy, and cerebral . . . and microgyria. (<i>Inglis</i> : May-June)	449
American Association of Pathologists and Bacteriologists —List of members of the . . . (July-August)	741
—Proceedings of the . . . (May-June)	509
Amyloidosis —Primary systemic . . . (report of a case associated with bone marrow plasmacytosis, hyperglobulinemia, and pemphigus vulgaris). (<i>Worken and Wolf</i> : May-June)	572*
Anencephaly —Anomalies of major cerebral arteries associated with congenital malformations of the brain. With special reference to the pathogenesis of (<i>Vogel and McClenahan</i> : July-August)	701
Aneurysm —Morphology of thrombotic thrombocytopenic purpura with demonstration of aneurysms. (<i>Orbison</i> : January-February)	129
—Scoliosis and dissecting . . . of the aorta in rats fed with <i>Lathyrus odoratus</i> seeds. (<i>Ponseti and Baird</i> : November-December)	1059
—Unusual pathologic manifestations of dissecting aortic . . . , including one example of so-called incomplete rupture. (<i>Hunter and Lium</i> : November-December)	1035
Angiitis —Necrotizing granulomatosis with . . . and the atypical pneumonitides. (<i>Fienberg</i> : May-June)	564*
Anitschkow cell sarcoma of the heart. (<i>Mainwaring and Ayres</i> : September-October)	823
Anomalies of major cerebral arteries associated with congenital malformations of the brain. With special reference to the pathogenesis of anencephaly. (<i>Vogel and McClenahan</i> : July-August)	701
Anoxia as a cause of endocardial fibroelastosis in infancy. (<i>Johnson</i> : May-June)	566*
Antibody —The effect of gamma radiation on . . . production and immunity. (<i>Hale and Stoner</i> : May-June)	554*
—The relation between morphologic and immunologic changes caused by radiation. (<i>Dixon and Talmage</i> : May-June)	554*

* Abstract of paper presented at the meeting of The American Association of Pathologists and Bacteriologists held at New York City, April 10, 11, and 12, 1952.

- Antigen**—The histology of antigenically stimulated lymph nodes in rabbits given ACTH or cortisone. (*Craig*: July-August) . . . 629
- Aorta**—Does brucellosis cause calcific aortic stenosis? II. The pathologic evidence. (*Peery*: May-June) . . . 523*
- Lipid deposition in aortas in younger age groups following cortisone and adrenocorticotrophic hormone. (*Etheridge and Hoch-Ligeti*: March-April) . . . 315
- Scoliosis and dissecting aneurysm of the . . . in rats fed with *Lathyrus odoratus* seeds. (*Ponseli and Baird*: November-December) 1059
- Structural alterations within the aortic intima in infancy and childhood. (*Prior and Jones*: May-June, 524*; September-October) . . . 937
- Unusual pathologic manifestations of dissecting aortic aneurysm, including one example of so-called incomplete rupture. (*Hunter and Liem*: November-December) . . . 1035
- Application of x-ray diffraction in pathology** (with particular reference to pulmonary graphitosis). (*MacMahon*: May-June) . . . 531*
- Arteriolar sclerosis**—The absence of lipid in pulmonary . . . (*Spain and Rosenshein*: May-June) . . . 525*
- Arteriolosclerosis**—The cholesterol of hyaline . . . (*Baker and Selikoff*: July-August) . . . 573
- Arteriovenous fistulas**—Experimental endocarditis and other changes in dogs with . . . and bacteremia. (*Bobb, Aegerter, and Anderson*: May-June) . . . 523*
- Artery**—Myocarditis, arteritis, and focal hepatic, splenic, and renal granulomas apparently due to penicillin sensitivity. (*Waugh*: May-June) . . . 437
- The rôle of arterial injury in the localization of methyl cellulose. (*Waters and Duff*: May-June) . . . 527*
- Aspiration of gastric contents**. An experimental study. (*Teabeaut*: January-February) . . . 51
- Atheroma**—Ceroid-like pigments, hemoceroid and hyaloceroid, in atheromatous lesions of human subjects. (*Hartroft*: May-June) . . . 526*
- The pathogenesis of . . . (*McLetchie*: May-June) . . . 413
- Atherosclerosis**—Experimental . . . in the rat. (*Bragdon and Boyle*: May-June) . . . 527*
- Atomic bomb**—Lesions in swine exposed to total body gamma radiation from an . . . source. (*Tullis, Lamson, and Madden*: May-June) . . . 545*
- Leukemia in human exposees to the Hiroshima and Nagasaki atomic bombs. (*Black-Schaffer, Kambe, Matsuoka, Watanabe, and Wedemeyer*: May-June) . . . 548*
- Atresia**—A form of hepatitis in the neonatal period simulating biliary . . . (*Craig and Landing*: May-June) . . . 519*
- Au¹⁹⁸**—Effects of radioactive gold on the rat liver. (*Koletskey*: May-June) . . . 552*
- Aureomycin**—The effect of . . . and terramycin on the x-radiated rat. (*Furth, Coulter, and Howland*: March-April) . . . 185
- The effect of . . . on the radiation syndrome in dogs. (*Furth, Coulter, and Howland*: January-February) . . . 25
- Autoradiography**—Some autoradiographic studies of the distribution of P³² and S³⁵ in mammalian tissues. (*Holt and Warren*: May-June) . . . 556*
- Bacteriologic studies of the x-radiated dog**. (*Furth, Coulter, and Howland*: March-April) . . . 171
- Basal cell**—Intraepithelial . . . epithelioma. (*Lund*: May-June) . . . 567*
- Bence Jones protein**—The precipitin test for . . . : report on the serologic tests on urine of 1000 individuals, employing antibody prepared by the adjuvant technic. (*Collier and Jackson*: May-June) . . . 561*
- Benign and malignant chordomas**. A clinico-anatomical study of twenty-two cases. (*Congdon*: September-October) . . . 793
- Beta rays**—The effect of . . . on the skin as a function of the energy, intensity, and duration of radiation. (*Moritz and Henriques*: May-June) . . . 567*

- Biopsy of the liver in infectious mononucleosis.** (*Wadsworth and Keil*: May-June, 517*; November-December) 1003
- Blastomycosis**—Destructive lesion of the adrenal gland in South American . . . (Lutz' disease). (*Magarinos Torres, Duarte, Guimarães, and Moreira*: January-February) 145
- Blood**—Relation of hemorrhage to hematopoiesis, . . . coagulation and mortality after total body x-irradiation. (*Rosenthal*: May-June) . . . 549*
- The effect of low dosage total body irradiation on the hematopoietic system of dogs. (*Van Baaren, Ragaz, and Angevine*: May-June) . . . 552*
- Blood vessels**—Aging processes in the arterial and venous system of the lower extremity. (*Pareira, Handler, and Blumenthal*: May-June) . . . 525*
- A study of vascular reaction to radiation: rabbit ear chamber technic. (*Moseley, Lushbaugh, and Hale*: May-June) 568*
- Necrotizing granulomatosis with angitis and the atypical pneumonitides. (*Fienberg*: May-June) 564*
- Pathogenesis of atheroma. (*McLetchie*: May-June) 413
- The cholesterol of hyaline arteriosclerosis. (*Baker and Selikoff*: July-August) 573
- Tuberculous lesions of the circulatory system. Report of two cases. (*Neumann*: September-October) 919
- Bone**—A histochemical study of irradiated (*Burstone*: November-December) 1133
- The effect of estrogens on the growth apparatus of the bones of immature rats. (*Budy, Urist, and McLean*: November-December) . . . 1143
- Bone marrow**—Correlation of . . . injury with mortality in different species of irradiated mammals. (*Brecher and Cronkite*: May-June) . . . 551*
- Bone marrow injection**—Modification of acute irradiation injury in mice and guinea-pigs by bone marrow injections: a histopathologic study. (*Congdon, Uphoff, and Lorenz*: May-June) 551*
- Brain**—Anomalies of major cerebral arteries associated with congenital malformations of the . . . With special reference to the pathogenesis of anencephaly. (*Vogel and McClenahan*: July-August) . . . 701
- Calcification in intracranial neoplasms. (*Martin and Lemmen*: November-December) 1107
- Iron deposits in the . . . compared with similar deposits in spleen, liver, lungs, and other organs, and their relationship to mental diseases and age. (*Strassmann*: May-June) 540*
- Pontine hemorrhage in intracranial hypertension. (*Fields and Halpert*: May-June) 541*
- The pathology of meningiomas. A study of 121 cases. (*Lapresle, Netsky, and Zimmerman*: September-October) 757
- Breast**—Further pilot echographic studies on the histologic structure of tumors of the living intact human (*Wild and Reid*: September-October) 839
- The myoepithelial cell in the normal (*Gershon-Cohen and Ingleby*: May-June) 565*
- Bronchial arteries. III.** Structural changes after division of the rat's left pulmonary artery. (*Ellis, Grindlay, and Edwards*: January-February) 89
- Bronchus**—The identification of types of pulmonary cancer in cytologic smears. (*Foot*: November-December) 963
- “Untreated” bronchogenic carcinoma. A report of thirty-five cases. (*Tanner and Gordon*: May-June, 536*; September-October) 953
- Brucellosis**—Does . . . cause calcific aortic stenosis? II. The pathologic evidence. (*Peery*: May-June) 523*
- Calcification in intracranial neoplasms.** (*Martin and Lemmen*: November-December) 1107
- Cancer**—The identification of types of pulmonary . . . in cytologic smears. (*Foot*: November-December) 963

- Capillary permeability**—Effects of tissue extracts and of protein-split products upon leukocytes and upon . . . (*Tershakovec and Moon: May-June*) . . . 522*
- Carcinolytic action of a series of new biologically significant dihydro-triazines.** (*Farber, Diamond, Foley, and Modest: May-June*) . . . 559*
- Carcinoma**—Intraepidermal basal cell epithelioma. (*Lund: May-June*) . . . 567*
- Morphology of the malignant squamous cell. A study of six thousand cells derived from squamous cell carcinomas of the uterine cervix. (*Reagan and Moore: January-February*) . . . 105
- Primary alveolar cell . . . of the lung. (*Fisher: May-June*) . . . 533*
- "Untreated" bronchogenic . . . A report of thirty-five cases. (*Tanner and Gordon: May-June, 536*; September-October*) . . . 953
- Cellular changes after ionizing radiation:** (histochemical study and ultra-violet microscopy. (*Sommers, Holt, and Warren: May-June*) . . . 543*
- Central nervous system**—Spontaneous demyelinating disease of adult rats. (*Pappenheimer: May-June*) . . . 347
- Ceroid-like pigments, hemoceroid and hyaloceroid, in atheromatous lesions of human subjects.** (*Hartroft: May-June*) . . . 526*
- Cervix**—Morphology of the malignant squamous cell. A study of six-thousand cells derived from squamous cell carcinomas of the uterine . . . (*Reagan and Moore: January-February*) . . . 105
- The similarity of the pregnancy effect on the epithelium of the maternal and fetal . . . (*Hellman and Rosenthal: May-June*) . . . 534*
- Cervix uteri**—Metaplasia, hyperplasia, and neoplasia in the uterine cervix during pregnancy. (*Reagan, Redding, and Merrill: May-June*) . . . 569*
- Chick embryo**—The pathologic changes produced in chick embryos by yolk sac inoculation of group A Cocksackie virus. (*Peers, Ransom, and Huebner: May-June*) . . . 515*
- Cholesterol of hyaline arteriolosclerosis.** (*Baker and Selikoff: July-August*) . . . 573
- Choline deficiency**—The dissolution of fatty cysts in precirrhotic and cirrhotic livers of choline-deficient rats treated with lipotropic factors. (*Hartroft and Sellers: May-June*) . . . 387
- Chondrosarcoma**—Selective uptake of radioactive sulfur by human chondrosarcomas. (*Gottschalk and Allen: May-June*) . . . 562*
- Chordoma**—Benign and malignant chordomas. A clinico-anatomical study of twenty-two cases. (*Congdon: September-October*) . . . 793
- Chronic glomerulonephritis and nephrotic syndrome induced in rats by N,N'-diacetyl-benzidine.** (*Harman, Miller, and Miller: May-June*) . . . 529*
- Cirrhosis**—The dissolution of fatty cysts in precirrhotic and cirrhotic livers of choline-deficient rats treated with lipotropic factors. (*Hartroft and Sellers: May-June*) . . . 387
- Clear cell myo-epithelioma of the skin.** Report of ten cases. (*Lever and Castleman: July-August*) . . . 691
- Clinicopathologic significance of multinucleated giant cells in the tubular epithelium of the kidney.** (*Ladewig: May-June*) . . . 538*
- Clotting defect**—Studies of the . . . in dogs following total body irradiation. (*Penick: May-June*) . . . 550*
- Co⁶⁰**—The effect of gamma radiation on antibody production and immunity. (*Hale and Stoner: May-June*) . . . 554*
- Coccidioides immitis**—Experimental coccidioidal granuloma. Developmental stages of sporangia in mice. (*Tarbet, Wright, and Newcomer: September-October*) . . . 901
- Colitis**—Liver damage in ulcerative . . . (*Kimmelstiel, Large, and Verner: March-April*) . . . 259
- Comparative histologic effects of 400 kilovolt and 23 million electron volt x-rays on the long bones of young albino rats.** (*Cauldwell and Bennett: May-June*) . . . 547*

- Comparative morphogenesis of the dermo-epidermal nevi and malignant melanoma. (*Berkheiser and Rappoport*: May-June) . . . 477
- Correlation of bone marrow injury with mortality in different species of irradiated mammals. (*Brecher and Cronkite*: May-June) . . . 551*
- Correlation of morphologic with metabolic changes in rat skin following exposure to beta (Sr^{90}) radiation. (*Lushbaugh and Hale*: May-June) . . . 556*
- Cortisone—Lipid deposition in aortas in younger age groups following . . . and adrenocorticotrophic hormone. (*Etheridge and Hoch-Ligeti*: March-April) . . . 315
- Studies on the nature and pathogenesis of muscular degeneration in . . .-treated rabbits. (*Ellis*: May-June) . . . 542*
- The histology of antigenically stimulated lymph nodes in rabbits given ACTH or (*Craig*: July-August) . . . 629
- The mechanism of action of . . . on experimental serum sickness. (*Germuth*: May-June) . . . 565*
- The pathology of . . .-enhanced poliomyelitis in the hamster following intracerebral inoculation of strain MEF₁. (*Aronson and Schwartzman*: May-June) . . . 516*
- Coxsackie virus—The histopathology of . . . infection in mice. I. Morphologic observations with four different viral types. (*Godman, Bunting, and Melnick*: March-April) . . . 223
- The histopathology of . . . infection in mice. II. Histo-chemical observations on the lesions in muscle and fat. (*Godman, Bunting, and Melnick*: July-August) . . . 583
- The pathologic changes produced in chick embryos by yolk sac inoculation of group A (*Peers, Ransom, and Huebner*: May-June) . . . 515*
- Cytologic diagnosis—The identification of types of pulmonary cancer in cytologic smears. (*Foot*: November-December) . . . 963
- Cytology of skin papillomas that yield virus-like particles. (*Bunting, Strauss, and Banfield*: November-December) . . . 985
- Demonstration of acid-fast bacilli in tissue sections. (*Wade*: January-February) . . . 157
- Dermatofibrosarcoma protuberans—The occurrence and distribution of glycogen in hemangioma, . . . , hemangiopericytoma, and Kaposi's sarcoma. (*Bangle*: November-December) . . . 1027
- Destructive lesion of the adrenal gland in South American blastomycosis (Lutz' disease). (*Magarinos Torres, Duarte, Guimarães, and Moreira*: January-February) . . . 145
- Determination of the mass of histologic structures by x-ray absorption. (*Fitzgerald, Beyer, Williams, and Sherman*: May-June) . . . 533*
- Developmental disturbances—Anomalies of major cerebral arteries associated with congenital malformations of the brain. With special reference to the pathogenesis of anencephaly. (*Vogel and McClenahan*: July-August) . . . 701
- Development of acute leukemia in human adults. (*Block and Jacobson*: May-June) . . . 562*
- Dextran—A histochemical study of the distribution and fate of . . . in tissues of the mouse. (*Mowry and Millican*: May-June) . . . 522*
- Diabetes mellitus—Familial . . . in mice, associated with insulin resistance, obesity, and hyperplasia of the islands of Langerhans. (*Bleisch, Mayer, and Dickie*: May-June) . . . 369
- Dihydrotriazine—Carcinolytic action of a series of new biologically significant dihydrotriazines. (*Farber, Diamond, Foley, and Modest*: May-June) . . . 559*
- Dissolution of fatty cysts in precirrhotic and cirrhotic livers of choline-deficient rats treated with lipotropic factors. (*Hartroft and Sellers*: May-June) . . . 387
- Does brucellosis cause calcific aortic stenosis? II. The pathologic evidence. (*Peery*: May-June) . . . 523*

- Dog**—Bacteriologic studies of the x-radiated (*Furth, Coulter, and Howland*: March-April) 171
- Experimental endocarditis and other changes in dogs with arteriovenous fistulas and bacteremia. (*Bobb, Aegerter, and Anderson*: May-June) 523*
- Morphologic alterations in the kidney during prolonged experimental renal and neurogenic hypertension in the (*Goldman, Schroeder, and Dammin*: May-June) 528*
- Observations on the Gomori substance in the hypothalamus of dogs and rats under normal and experimental conditions. (*Laqueur*: May-June) 521*
- Probable Hodgkin's disease in a (*Bloom*: May-June) 534*
- Studies of the clotting defect in dogs following total body irradiation. (*Penick*: May-June) 550*
- The effect of aureomycin on the radiation syndrome in dogs. (*Furth, Coulter, and Howland*: January-February) 25
- The effect of low dosage total body irradiation on the hematopoietic system of dogs. (*Van Baaren, Ragaz, and Angevine*: May-June) 552*
- The effects of fluid and electrolyte balance on bilaterally nephrectomized dogs. (*Orbison, Christian, and Peters*: May-June) 529*
- Duck**—Tumors produced by methylcholanthrene in the . . . : papilloma, squamous cell carcinoma, and hemangioma. (*Rigdon*: May-June) 558*
- Echography**—Further pilot echographic studies on the histologic structure of tumors of the living intact human breast. (*Wild and Reid*: September-October) 839
- Effect of aureomycin and terramycin on the x-radiated rat.** (*Furth, Coulter, and Howland*: March-April) 185
- Effect of aureomycin on the radiation syndrome** in dogs. (*Furth, Coulter, and Howland*: January-February) 25
- Effect of beta rays on the skin** as a function of the energy, intensity, and duration of radiation. (*Moritz and Henriques*: May-June) 567*
- Effect of estrogens on the growth apparatus of the bones of immature rats.** (*Budy, Urist, and McLean*: November-December) 1143
- Effect of gamma radiation on antibody production and immunity.** (*Hale, and Stoner*: May-June) 554*
- Effect of inorganic urine phosphate on the development of hemoglobinuric nephrosis** in rabbits. (*Lalich*: May-June) 530*
- Effect of low dosage total body irradiation on the hematopoietic system of dogs.** (*Van Baaren, Ragaz, and Angevine*: May-June) 552*
- Effect of repeated x-radiation of the whole body on the development of tumors in rats fed p-dimethyl-amino-azobenzene.** (*Hoch-Ligeti*: May-June) 565*
- Effect of whole body x-radiation upon cell division** in radiosensitive and radioresistant tissues. (*Williams, deLong, and Jaffe*: May-June) 546*
- Effect of x-rays on the virus-host cell relationship.** (*Cheever*: May-June) 553*
- Effects of fluid and electrolyte balance on bilaterally nephrectomized dogs.** (*Orbison, Christian, and Peters*: May-June) 529*
- Effects of radioactive gold on the rat liver.** (*Koletsky*: May-June) 552*
- Effects of tissue extracts and of protein-split products upon leukocytes and upon capillary permeability.** (*Tershakovec and Moon*: May-June) 522*
- Effects of total body radiation on a chronic, latent infection** in which immunity is not dependent on the spleen (toxoplasmosis). (*Frenkel, Jacobs, and Melton*: May-June) 555*
- Effects of x-ray on trichina larvae.** (*Gould*: May-June) 554*
- Effects on the white mouse of a single whole-body exposure to 190 mev. deuterons.** (*Rosahn, Tobias, and Lawrence*: January-February) 37
- Electron microscopy**—The structural basis of sickling and its (*Rebuck, Monto, and Sturrock*: May-June) 530*

- Electrophoretic study of the origin of the abnormal plasma proteins in multiple myeloma.** (*Miller, Brown, Miller, and Eitelman*: May-June) 560*
- Encephalomyelitis**—Interaction between eastern equine . . . virus and certain resorcinol derivatives. (*Sanders, Kabara, Sorel, and Akin*: May-June) 515*
- Endocarditis**—Experimental . . . and other changes in dogs with arteriovenous fistulas and bacteremia. (*Bobb, Aegerter, and Anderson*: May-June) 523*
- Endophlebohypertrophy and phleboscclerosis.** II. The external and common iliac veins. (*Lev and Saphir*: May-June) 401
- Epidemic hemorrhagic fever**—The pathology of . . . (*Hullinghorst*: May-June) 517*
- Erythroblastosis**—Experimental . . . fetalis. (*Kellner and Hedel*: May-June) 539*
- Estrogen**—The effect of estrogens on the growth apparatus of the bones of immature rats. (*Budy, Urist, and McLean*: November-December) 1143
- Ethionine**—Hepatic and pancreatic changes produced in rats by . . . and their relation to human lesions. (*Popper, de la Huerga, and Koch-Weser*: May-June) 518*
- Experimental atherosclerosis in the rat.** (*Bragdon and Boyle*: May-June) 527*
- Experimental coccidioid granuloma.** Developmental stages of sporangia in mice. (*Tarbet, Wright, and Newcomer*: September-October) 901
- Experimental endocarditis and other changes in dogs with arteriovenous fistulas and bacteremia.** (*Bobb, Aegerter, and Anderson*: May-June) 523*
- Experimental endogenous lipoid pneumonia.** (*Gross, Brown, and Hatch*: March-April) 211
- Experimental erythroblastosis fetalis.** (*Kellner and Hedel*: May-June) 539*
- Extrahepatic obstructive jaundice in liver biopsy specimens.** (*Szanto, Popper, and Manuell*: May-June) 518*
- Factors concerned in the development of experimental testicular tumors in rats.** (*Biskind, Bernstein, and Biskind*: May-June) 559*
- Familial diabetes mellitus in mice,** associated with insulin resistance, obesity, and hyperplasia of the islands of Langerhans. (*Bleisch, Mayer, and Dickie*: May-June) 369
- Fibroelastosis**—Anoxia as a cause of endocardial . . . in infancy. (*Johnson*: May-June) 566*
- Fibroplasia**—The inhibitory effect of beta radiation (P^{32}) on . . . in rat skin. (*Lushbaugh and Storer*: May-June) 548*
- Fluorescent microscopy**—Histochemical and fluorescent microscopic studies of ground substance. (*Joel and Hopps*: May-June) 532*
- Form of hepatitis in the neonatal period simulating biliary atresia.** (*Craig and Landing*: May-June) 519*
- Frozen sectioning.** A new and rapid method. (*Bush and Hewitt*: September-October) 863
- Further pilot echographic studies on the histologic structure of tumors of the living intact human breast.** (*Wild and Reid*: September-October) 839
- Further studies on the pathogenesis of urate calculi in the urinary tract of white rats.** (*Ungar and Ungar*: March-April) 291
- Gamma rays**—Lesions in swine exposed to total body gamma radiation from an atomic bomb source. (*Tullis, Lamson, and Madden*: May-June) 545*
- General pathology of radiation reaction.** (*Warren*: May-June) 551*
- Giant cell myocarditis.** (*Kean and Hoekenga*: November-December) 1095
- Giant cells**—The clinicopathologic significance of multinucleated . . . in the tubular epithelium of the kidney. (*Ladewig*: May-June) 538*
- Glioblastoma multiforme**—A study of . . . by the Golgi method. (*Klatzo*: May-June) 357

- Glomerulonephritis**—Chronic . . . and nephrotic syndrome induced in rats by N,N'-diacetyl-benzidine. (*Harman, Miller, and Miller*: May-June) 529*
- Studies on the pathogenesis of (*Hopps, Kelly, and Engles*: May-June) 529*
- Glomerulus**—Histochemical correlations in ischemic obsolescence of glomeruli. (*McManus and Lupton*: May-June) 537*
- Phase microscope studies of renal glomeruli. Glomerular deposits of "hyaline" substances. (*Churg and Grishman*: May-June) 537*
- The normal . . . and its basic reactions in disease. (*Rinehart, Farquhar, Jung, and Abul-Haj*: May-June) 537*
- Glycogen**—Observations on the persistence of hepatic . . . after death. (*Morriane and Mamelok*: May-June) 497
- The occurrence and distribution of . . . in hemangioma, dermatofibrosarcoma protuberans, hemangiopericytoma, and Kaposi's sarcoma. (*Bangle*: November-December) 1027
- Gomori substance**—Observations on the . . . in the hypothalamus of dogs and rats under normal and experimental conditions. (*Laqueur*: May-June) 521*
- Granuloma**—Experimental coccidioid Developmental stages of sporangia in mice. (*Tarbet, Wright, and Newcomer*: September-October) 901
- Myocarditis, arteritis, and focal hepatic, splenic, and renal granulomas apparently due to penicillin sensitivity. (*Waugh*: May-June) 437
- Necrotizing granulomatosis with angiitis and the atypical pneumonitides. (*Fienberg*: May-June) 564*
- Graphitosis**—The application of x-ray diffraction in pathology (with particular reference to pulmonary . . .). (*MacMahon*: May-June) 531*
- Ground substance**—Histochemical and fluorescent microscopic studies of (*Joel and Hopps*: May-June) 532*
- Guinea-pig**—Modification of acute irradiation injury in mice and guinea-pigs by bone marrow injections: a histopathologic study. (*Congdon, Uphoff, and Lorenz*: May-June) 551*
- Splenomegaly and Kurloff cell hyperplasia in guinea-pigs treated with stilbestrol. (*Nadel*: May-June) 568*
- Hamartoma of the spleen**. A report of four cases. (*Coe and Von Drashek*: July-August) 663
- Hamster**—The pathology of cortisone-enhanced poliomyelitis in the . . . following intracerebral inoculation of strain MEF₁. (*Aronson and Schwartzman*: May-June) 516*
- Heart**—Autschkow cell sarcoma of the (*Mainwaring and Ayres*: September-October) 823
- Anoxia as a cause of endocardial fibroelastosis in infancy. (*Johnson*: May-June) 566*
- Interstitial pneumonia and focal myocarditis in poliomyelitis. (*Jurow and Dolgopol*: May-June) 566*
- Myocarditis, arteritis, and focal hepatic, splenic, and renal granulomas apparently due to penicillin sensitivity. (*Waugh*: May-June) 437
- Tuberculous lesions of the circulatory system. Report of two cases. (*Neumann*: September-October) 919
- Hemagglutination test in pulmonary tuberculosis**. (*Cruickshank and Wicks*: May-June) 564*
- Hemangioma**—The occurrence and distribution of glycogen in . . . , dermatofibrosarcoma protuberans, hemangiopericytoma, and Kaposi's sarcoma. (*Bangle*: November-December) 1027
- Hemangiopericytoma**: histologic and tissue culture studies. (*Fisher, Kaufman, and Mason*: July-August) 653
- The occurrence and distribution of glycogen in hemangioma, dermatofibrosarcoma protuberans, . . . , and Kaposi's sarcoma. (*Bangle*: November-December) 1027

- Hemi-atrophy**—The nature of agenesis and deficiency of parts. The influence of intrinsic factors in disease when development of the body is abnormal, as illustrated by agenesis of the digits, facial . . . , and cerebral agyria and microgyria. (*Inglis*: May-June) . . . 449
- Hemoceroid**—Ceroid-like pigments, . . . and hyaloceroid, in atheromatous lesions of human subjects. (*Hartroft*: May-June) . . . 526*
- Hemochromatosis**—Observations on exogenous . . . apparently due to multiple transfusions. (*Graef, Gordon, Newman, Olivetti, and Klein*: May-June) . . . 538*
- Hemoglobin-derived and iron-storage pigments in cells**: microspectroscopic analysis. (*Mellors*: May-June) . . . 540*
- Hemoglobinuria**—The effect of inorganic urine phosphate on the development of hemoglobinuric nephrosis in rabbits. (*Lalich*: May-June) . . . 530*
- Hemorrhage**—Pontine . . . in intracranial hypertension. (*Fields and Halpert*: May-June) . . . 541*
- Pulmonary . . . in infants. A descriptive study. (*Ahvenainen and Call*: January-February) . . . I
- Pulmonary . . . Experimental studies. (*Ahvenainen and Call*: March-April) . . . 193
- Relation of . . . to hematopoiesis, blood coagulation and mortality after total body x-irradiation. (*Rosenthal*: May-June) . . . 549*
- Hemosiderin**—Hemoglobin-derived and iron-storage pigments in cells: microspectroscopic analysis. (*Mellors*: May-June) . . . 540*
- Iron deposits in the brain compared with similar deposits in spleen, liver, lungs, and other organs, and their relationship to mental diseases and age. (*Strassmann*: May-June) . . . 540*
- Hepatic and pancreatic changes produced in rats by ethionine** and their relation to human lesions. (*Popper, de la Huerga, and Koch-Weser*: May-June) . . . 518*
- Heredity**—Familial diabetes mellitus in mice, associated with insulin resistance, obesity, and hyperplasia of the islands of Langerhans. (*Bleisch, Mayer, and Dickie*: May-June) . . . 369
- Histamine**—Pathologic changes in the gastric mucosa of the rat after . . . administration. (*Cambel and Sgouris*: November-December) . . . 1079
- Histochemical and fluorescent microscopic studies of ground substance**. (*Joel and Hopps*: May-June) . . . 532*
- Histochemical and morphologic differentiation of induced tumors of the liver in rats**. (*Firminger and Mulay*: May-June) . . . 559*
- Histochemical correlations in ischemic obsolescence of glomeruli**. (*McManus and Lupton*: May-June) . . . 537*
- Histochemical study of irradiated bone**. (*Burstone*: November-December) . . . 1133
- Histochemical study of the distribution and fate of dextran in tissues of the mouse**. (*Mowry and Millican*: May-June) . . . 522*
- Histogenesis of malignant mixed tumors of Müllerian origin** (mixed mesodermal tumor of the uterus). (*Clark, Sternberg, and Smith*: May-June) . . . 563*
- Histologic effects of therapeutic doses of radioactive iodine on the thyroid gland of man**. (*Vickery*: May-June) . . . 552*
- Histology of antigenically stimulated lymph nodes in rabbits given ACTH or cortisone**. (*Craig*: July-August) . . . 629
- Histology of the exteriorized gastric mucosa of the rat**. (*Stevens and Toovey*: May-June) . . . 570*
- Histopathology of Coxsackie virus infection in mice**. I. Morphologic observations with four different viral types. (*Godman, Bunting, and Melnick*: March-April) . . . 223
- II. Histochemical observations on the lesions in muscle and fat. (*Godman, Bunting, and Melnick*: July-August) . . . 583
- Histoplasmosis**—Sarcoidosis and (*Iverson and Pinkerton*: May-June) . . . 542*

- Hodgkin's disease**—Probable ... in a dog. (*Bloom*: May-June) . . . 534*
- Hyalin**—Phase microscope studies of renal glomeruli. Glomerular deposits of "hyaline" substances. (*Churg and Grishman*: May-June) . . . 537*
- Hyaloceroid**—Ceroid-like pigments, hemocroid and ..., in atheromatous lesions of human subjects. (*Hartroft*: May-June) . . . 526*
- Hypersplenism**—The spleen in ... (*Leffler*: March-April) . . . 303
- Hypertension**—Morphologic alterations in the kidney during prolonged experimental renal and neurogenic ... in the dog. (*Goldman, Schroeder, and Dammin*: May-June) . . . 528*
- Pathogenesis of polyarteritis nodosa in hypertensive rats. (*Race and Peschel*: May-June) . . . 527*
- Pontine hemorrhage in intracranial ... (*Fields and Halpert*: May-June) . . . 541*
- Hypophysis**—Pituitary necrosis in routine necropsies. (*Plaut*: May-June, 542*; September-October) . . . 883
- Hypothalamus**—Observations on the Gomori substance in the ... of dogs and rats under normal and experimental conditions. (*Laqueur*: May-June) . . . 521*
- I¹³¹**—Histologic effects of therapeutic doses of radioactive iodine on the thyroid gland of man. (*Vickery*: May-June) . . . 552*
- Morphology of transplantable pituitary tumors induced by radioactive iodine and the associated secondary changes. (*Furth*: May-June) . . . 548*
- Skeletal development and degenerative joint disease in mice treated with radioactive iodine (...). (*Silberberg and Silberberg*: May-June) . . . 569*
- Icterus**—Extrahepatic obstructive jaundice in liver biopsy specimens. (*Szanto, Popper, and Manuell*: May-June) . . . 518*
- Identification of types of pulmonary cancer in cytologic smears.** (*Foot*: November-December) . . . 963
- Immunity to tumors transplanted in the brain of heterologous hosts.** (*Eichwald, Rambo, and Henry*: May-June) . . . 557*
- Incipient adenocarcinoma of the stomach in peptic ulcer.** Report of two cases. (*Yesner*: May-June) . . . 571*
- Inflammatory fibroid polyps of the stomach.** (*Helwig and Ranier*: May-June) . . . 535*
- Inhibitory effect of beta radiation (P³²) on fibroplasia in rat skin.** (*Lushbaugh and Storer*: May-June) . . . 548*
- Insulin**—Familial diabetes mellitus in mice, associated with ... resistance, obesity, and hyperplasia of the islands of Langerhans. (*Bleisch, Mayer, and Dickie*: May-June) . . . 369
- Interaction between eastern equine encephalomyelitis virus and certain resorcinol derivatives.** (*Sanders, Kabara, Soret, and Akin*: May-June) . . . 515*
- Interstitial pneumonia and focal myocarditis in poliomyelitis.** (*Jurow and Dolgopol*: May-June) . . . 566*
- Intraepidermal basal cell epithelioma.** (*Lund*: May-June) . . . 567*
- Iron deposits in the brain** compared with similar deposits in spleen, liver, lungs, and other organs, and their relationship to mental diseases and age. (*Strassmann*: May-June) . . . 540*
- Irradiation**—A correlation of morphologic with metabolic change in rat skin following exposure to beta (Sr⁹⁰) radiation. (*Lushbaugh and Hale*: May-June) . . . 556*
- A histochemical study of irradiated bone. (*Burstone*: November-December) . . . 1133
- A study of vascular reaction to radiation: rabbit ear chamber technic. (*Moseley, Lushbaugh, and Hale*: May-June) . . . 568*
- Bacteriologic studies of the x-radiated dog. (*Furth, Coulter, and Howland*: March-April) . . . 171

- Cellular changes after ionizing radiation: histochemical study and ultra-violet microscopy. (*Sommers, Holt, and Warren*: May-June) 543*
- Comparative histologic effects of 400 kilovolt and 23 million electron volt x-rays on the long bones of young albino rats. (*Cauldwell and Bennett*: May-June) 547*
- Correlation of bone marrow injury with mortality in different species of irradiated mammals. (*Brecher and Cronkite*: May-June) 551*
- Effect of repeated x-radiation of the whole body on the development of tumors in rats fed *p*-dimethyl-amino-azobenzene. (*Hoch-Ligeti*: May-June) 565*
- Effects of radioactive gold on the rat liver. (*Koletsky*: May-June) 552*
- Effects of total body radiation on a chronic, latent infection in which immunity is not dependent on the spleen (toxoplasmosis). (*Frenkel, Jacobs, and Melton*: May-June) 555*
- Effects of x-ray on trichina larvae. (*Gould*: May-June) 554*
- Effects on the white mouse of a single whole-body exposure to 190 mev. deuterons. (*Rosahn, Tobias, and Lawrence*: January-February) 37
- Histologic effects of therapeutic doses of radioactive iodine on the thyroid gland of man. (*Vickery*: May-June) 552*
- Lesions in swine exposed to total body gamma radiation from an atomic bomb source. (*Tullis, Lamson, and Madden*: May-June) 545*
- Leukemia in human exposees to the Hiroshima and Nagasaki atomic bombs. (*Black-Schaffer, Kambe, Matsuoka, Watanabe, and Wedemeyer*: May-June) 548*
- Modification of acute . . . injury in mice and guinea-pigs by bone marrow injections: a histopathologic study. (*Congdon, Uphoff, and Lorenz*: May-June) 551*
- Morphology of transplantable pituitary tumors induced by radioactive iodine and the associated secondary changes. (*Furth*: May-June) 548*
- Nuclear changes following . . . of tumors. (*Brues*: May-June) 547*
- Pathologic changes in parabiotic rats after hemi-adrenalectomy and x-radiation. (*Edwards and Sommers*: May-June) 545*
- Primary osteogenic sarcoma following x. . . . (*Blumberg and Hufner*: May-June) 563*
- Relation of hemorrhage to hematopoiesis, blood coagulation and mortality after total body x. . . . (*Rosenthal*: May-June) 549*
- Skeletal development and degenerative joint disease in mice treated with radioactive iodine (I^{131}). (*Silberberg and Silberberg*: May-June) 569*
- Some autoradiographic studies of the distribution of P^{32} and S^{35} in mammalian tissues. (*Holt and Warren*: May-June) 556*
- Some similarities of action between ionizing radiation and sulphydryl enzyme inhibition *in vivo*. (*Hicks*: May-June) 544*
- Studies of the clotting defect in dogs following total body (*Penick*: May-June) 550*
- The effect of aureomycin and terramycin on the x-radiated rat. (*Furth, Coulter, and Howland*: March-April) 185
- The effect of aureomycin on the radiation syndrome in dogs. (*Furth, Coulter, and Howland*: January-February) 25
- The effect of beta rays on the skin as a function of the energy, intensity, and duration of radiation. (*Morits and Henriques*: May-June) 567*
- The effect of gamma radiation on antibody production and immunity. (*Hale and Stone*: May-June) 554*
- The effect of low dosage total body . . . on the hematopoietic system of dogs. (*Van Baaren, Ragaz, and Angevine*: May-June) 552*
- The effect of whole body x-radiation upon cell division in radio-sensitive and radioresistant tissues. (*Williams, deLong, and Jaffe*: May-June) 546*

- The effect of x-rays on the virus-host cell relationship. (*Cheever: May-June*) 551*
- The general pathology of radiation reaction. (*Warren: May-June*) 553*
- The inhibitory effect of beta radiation (P^{32}) on fibroplasia in rat skin. (*Lushbaugh and Storer: May-June*) 548*
- The pathology of the acute radiation syndrome in man. (*Lisco: May-June*) 549*
- The relation between morphologic and immunologic changes caused by radiation. (*Dixon and Talmage: May-June*) 554*
- Therapy of the x-... syndrome with terramycin. (*Coulter, Furth, and Howland: September-October*) 875

- Kaposi's sarcoma**—The occurrence and distribution of glycogen in hemangioma, dermatofibrosarcoma protuberans, hemangiopericytoma, and ... (*Bangle: November-December*) 1027
- Kidney**—Chronic glomerulonephritis and nephrotic syndrome induced in rats by N,N'-diacetyl-benzidine. (*Harman, Miller, and Miller: May-June*) 529*
- Morphologic alterations in the ... during prolonged experimental renal and neurogenic hypertension in the dog. (*Goldman, Schroeder, and Dammin: May-June*) 528*
- Myocarditis, arteritis, and focal hepatic, splenic, and renal granulomas apparently due to penicillin sensitivity. (*Waugh: May-June*) 437
- Phase microscope studies of renal glomeruli. Glomerular deposits of "hyaline" substances. (*Churg and Grishman: May-June*) 537*
- Studies on the pathogenesis of glomerulonephritis. (*Hopps, Kelly, and Engles: May-June*) 529*
- The clinicopathologic significance of multinucleated giant cells in the tubular epithelium of the ... (*Ladewig: May-June*) 538*
- The effects of fluid and electrolyte balance on bilaterally nephrectomized dogs. (*Orbison, Christian, and Peters: May-June*) 529*
- The normal glomerulus and its basic reactions in disease. (*Rinehart, Farquhar, Jung, and Abul-Haj: May-June*) 537*
- Kurloff cell**—Splenomegaly and ... hyperplasia in guinea-pigs treated with stilbestrol. (*Nadel: May-June*) 568*

- Lathyrus odoratus**—Scoliosis and dissecting aneurysm of the aorta in rats fed with ... seeds. (*Ponseti and Baird: November-December*) 1059
- Leiomyoma**—Reticulum pattern in smooth muscle tumors. (*Mulligan: May-June*) 535*
- Leprosy**—Demonstration of acid-fast bacilli in tissue sections. (*Wade: January-February*) 157
- Lesions in swine exposed to total body gamma radiation** from an atomic bomb source. (*Tullis, Lamson, and Madden: May-June*) 545*
- Leukemia**—Development of acute ... in human adults. (*Block and Jacobson: May-June*) 562*
- Leukemia in human exposees to the Hiroshima and Nagasaki atomic bombs.** (*Black-Schaffer, Kambe, Matsuoka, Watanabe, and Wedemeyer: May-June*) 548*
- Lipid deposition in aortas in younger age groups following cortisone and adrenocorticotrophic hormone.** (*Etheridge and Hoch-Ligeti: March-April*) 315
- Lipoid pneumonia**—Experimental endogenous ... (*Gross, Brown, and Hatch: March-April*) 211
- Liver**—A form of hepatitis in the neonatal period simulating biliary atresia. (*Craig and Landing: May-June*) 519*
- Biopsy of the ... in infectious mononucleosis. (*Wadsworth and Keil: May-June, 517**; *November-December*) 1003
- Effects of radioactive gold on the rat ... (*Koletsky: May-June*) 552*
- Extrahepatic obstructive jaundice in ... biopsy specimens. (*Ssanto, Popper, and Manuel: May-June*) 518*

- Hepatic and pancreatic changes produced in rats by ethionine and their relation to human lesions. (*Popper, de la Hueriga, and Koch-Weser*: May-June) 518*
- Histochemical and morphologic differentiation of induced tumors of the . . . in rats. (*Firminger and Mulay*: May-June) 559*
- Myocarditis, arteritis, and focal hepatic, splenic, and renal granulomas apparently due to penicillin sensitivity. (*Waugh*: May-June) 437
- Observations on the persistence of hepatic glycogen after death. (*Morrione and Mamelok*: May-June) 497
- The dissolution of fatty cysts in precirrhotic and cirrhotic livers of choline-deficient rats treated with lipotropic factors. (*Hartroft and Sellers*: May-June) 387
- Liver damage in ulcerative colitis.** (*Kimmelstiel, Large, and Verner*: March-April) 259
- Loss of tumor-immune activity from serum following exposure to injured lymphoid cells.** (*Stoerk*: May-June) 532*
- Lung**—Aspiration of gastric contents. An experimental study. (*Teabeaut*: January-February) 51
- Experimental endogenous lipid pneumonia. (*Gross, Brown, and Hatch*: March-April) 211
- Interstitial pneumonia and focal myocarditis in poliomyelitis. (*Jurow and Dolgopol*: May-June) 566*
- Necrotizing granulomatosis with angitis and the atypical pneumonitides. (*Fienberg*: May-June) 564*
- Primary alveolar cell carcinoma of the (*Fisher*: May-June) 533*
- Pulmonary fibrosis secondary to pneumonia. (*Auerbach, Mims, and Goodpasture*: January-February) 69
- Pulmonary hemorrhage in infants. A descriptive study. (*Ahvenainen and Call*: January-February) 1
- Pulmonary hemorrhage. Experimental studies. (*Ahvenainen and Call*: March-April) 193
- The absence of lipid in pulmonary arteriolar sclerosis. (*Spain and Rosenshein*: May-June) 525*
- The application of x-ray diffraction in pathology (with particular reference to pulmonary graphitosis). (*MacMahon*: May-June) 531*
- The bronchial arteries. III. Structural changes after division of the rat's left pulmonary artery. (*Ellis, Grindlay, and Edwards*: January-February) 89
- The identification of types of pulmonary cancer in cytologic smears. (*Foot*: November-December) 963
- The muscle tissue of the . . . in chronic pulmonary disease. (*Liebow, Loring, and Felton*: May-June) 541*
- Transpulmonary passage of tumor cell emboli. (*Zeidman and Buss*: May-June) 533*
- Lymph nodes**—The histology of antigenically stimulated . . . in rabbits given ACTH or cortisone. (*Craig*: July-August) 629
- Mammals**—Shock disease in captive wild (*Christian and Ratcliffe*: July-August) 725
- Mechanism of action of cortisone on experimental serum sickness.** (*Germuth*: May-June) 565*
- Melanoblastoma**—The comparative morphogenesis of the dermo-epidermal nevi and malignant melanoma. (*Berkheiser and Rappoport*: May-June) 477
- Membership list**—American Association of Pathologists and Bacteriologists. (July-August) 741
- Meningioma**—The pathology of meningiomas. A study of 121 cases. (*Lapresle, Netsky, and Zimmerman*: September-October) 757
- Mesodermal tumor**—The histogenesis of malignant mixed tumors of Mullerian origin (mixed . . . of the uterus). (*Clark, Sternberg, and Smith*: May-June) 563*

- Metabolism**—Neotetrazolium as a histochemical index of cell . . . in the ovary. (*Foraker and Denham*: May-June) . . . 521*
- Metaplasia, hyperplasia, and neoplasia in the uterine cervix during pregnancy.** (*Reagan, Redding, and Merrill*: May-June) . . . 569*
- Methylcholanthrene**—Properties of transplantable . . . -induced sarcomas in the newt. (*Breedis*: May-June) . . . 560*
- Tumors produced by . . . in the duck: papilloma, squamous cell carcinoma, and hemangioma. (*Rigdon*: May-June) . . . 558*
- Microgyria**—The nature of agenesis and deficiency of parts. The influence of intrinsic factors in disease when development of the body is abnormal, as illustrated by agenesis of the digits, facial hemiatrophy, and cerebral agyria and . . . (*Inglis*: May-June) . . . 449
- Microspectroscopy**—Hemoglobin-derived and iron-storage pigments in cells: microspectroscopic analysis. (*Mellors*: May-June) . . . 540*
- Mixed tumors of the skin.** (*Morehead*: May-June) . . . 536*
- Modification of acute irradiation injury in mice and guinea-pigs by bone marrow injections:** a histopathologic study. (*Congdon, Uphoff, and Lorenz*: May-June) . . . 551*
- Mononucleosis**—Biopsy of the liver in infectious . . . (*Wadsworth and Keil*: May-June, 517*; November-December) . . . 1003
- Morphologic alterations in the kidney during prolonged experimental renal and neurogenic hypertension in the dog.** (*Goldman, Schroeder, and Dammin*: May-June) . . . 528*
- Morphology of the malignant squamous cell.** A study of six thousand cells derived from squamous cell carcinomas of the uterine cervix. (*Reagan and Moore*: January-February) . . . 105
- Morphology of thrombotic thrombocytopenic purpura** with demonstration of aneurysms. (*Orbison*: January-February) . . . 129
- Morphology of transplantable pituitary tumors induced by radioactive iodine and the associated secondary changes.** (*Furth*: May-June) . . . 548*
- Mouse**—A histochemical study of the distribution and fate of dextran in tissues of the . . . (*Mowry and Millican*: May-June) . . . 522*
- Effects on the white . . . of a single whole-body exposure to 190 mev. deuterons. (*Rosahn, Tobias, and Lawrence*: January-February) . . . 37
- Experimental coccidioid granuloma. Developmental stages of sporangia in mice. (*Tarbet, Wright, and Newcomer*: September-October) . . . 901
- Familial diabetes mellitus in mice, associated with insulin resistance, obesity, and hyperplasia of the islands of Langerhans. (*Bleisch, Mayer, and Dickie*: May-June) . . . 369
- Modification of acute irradiation injury in mice and guinea-pigs by bone marrow injections: a histopathologic study. (*Congdon, Uphoff, and Lorenz*: May-June) . . . 551*
- Skeletal development and degenerative joint disease in mice treated with radioactive iodine (I^{131}). (*Silberberg and Silberberg*: May-June) . . . 569*
- The histopathology of Coxsackie virus infection in mice. I. Morphologic observations with four different viral types. (*Godman, Bunting, and Melnick*: March-April) . . . 223
- The histopathology of Coxsackie virus infection in mice. II. Histochemical observations on the lesions in muscle and fat. (*Godman, Bunting, and Melnick*: July-August) . . . 583
- Muscle**—Studies on the nature and pathogenesis of muscular degeneration in cortisone-treated rabbits. (*Ellis*: May-June) . . . 542*
- Muscle tissue of the lung in chronic pulmonary disease.** (*Liebow, Loring, and Felton*: May-June) . . . 541*
- Myeloma**—An electrophoretic study of the origin of the abnormal plasma proteins in multiple . . . (*Miller, Brown, Miller, and Eitelman*: May-June) . . . 560*

- The precipitin test for Bence Jones protein: report on the serologic tests on urine of 1000 individuals, employing antibody prepared by the adjuvant technic. (*Collier and Jackson*: May-June) 561*
- Myocarditis**—Giant cell (*Kean and Hoekenga*: November-December) 1095
- Interstitial pneumonia and focal . . . in poliomyelitis. (*Jurow and Dolgopol*: May-June) 566*
- Myocarditis, arteritis, and focal hepatic, splenic, and renal granulomas** apparently due to penicillin sensitivity. (*Waugh*: May-June) 437
- Myocarditis in association with varicella.** (*Hackel*: May-June) 516*
- Myo-epithelial cell in the normal breast.** (*Gershon-Cohen and Ingleby*: May-June) 565*
- Myo-epithelioma**—Clear cell . . . of the skin. Report of ten cases. (*Lever and Castleman*: July-August) 691
- Natural history of the lesions in sarcoidosis.** (*Barrie and Bogoch*: May-June) 541*
- Natural resistance and acquired immunity to tumors transplanted to the anterior chamber of homologous hosts.** (*Eichwald, Chang, and Hattori*: May-June) 557*
- Nature of agenesis and deficiency of parts.** The influence of intrinsic factors in disease when development of the body is abnormal, as illustrated by agenesis of the digits, facial hemi-atrophy, and cerebral agyria and microgyria. (*Inglis*: May-June) 449
- Necrosis**—Pituitary . . . in routine necropsies. (*Plaut*: May-June, 542*; September-October) 883
- Necrotizing granulomatosis with angitis and the atypical pneumonitides.** (*Fienberg*: May-June) 564*
- N,N'-diacetyl-benzidine**—Chronic glomerulonephritis and nephrotic syndrome induced in rats by (*Harman, Miller, and Miller*: May-June) 529*
- Neoplasia**—See also under anatomical location.
- See also under specific neoplasm.
- Calcification in intracranial neoplasms. (*Martin and Lemmen*: November-December) 1107
- Carcinolytic action of a series of new biologically significant dihydrotriazines. (*Farber, Diamond, Foley, and Modest*: May-June) 559*
- Effect of repeated x-radiation of the whole body on the development of tumors in rats fed *p*-dimethyl-amino-azobenzene. (*Hoch-Ligeti*: May-June) 565*
- Factors concerned in the development of experimental testicular tumors in rats. (*Biskind, Bernstein, and Biskind*: May-June) 559*
- Further pilot echographic studies on the histologic structure of tumors of the living intact human breast. (*Wild and Reia*: September-October) 839
- Histochemical and morphologic differentiation of induced tumors of the liver in rats. (*Firminger and Mulay*: May-June) 559*
- Immunity to tumors transplanted in the brain of heterologous hosts. (*Eichwald, Rambo, and Henry*: May-June) 557*
- Morphology of transplantable pituitary tumors induced by radioactive iodine and the associated secondary changes. (*Furth*: May-June) 548*
- Natural resistance and acquired immunity to tumors transplanted to the anterior chamber of homologous hosts. (*Eichwald, Chang, and Hattori*: May-June) 557*
- Nuclear changes following irradiation of tumors. (*Brues*: May-June) 547*
- Properties of transplantable methylcholanthrene-induced sarcomas in the newt. (*Breedis*: May-June) 560*
- Some effects of concentrated aqueous extracts of malignant tumors on cancer patients. (*Weiss*: May-June) 571*

- The occurrence in tarred rabbit skin of minor, almost imperceptible, neoplastic changes. (*Rous and Rogers*: May-June) 558*
- The survival of human tumor tissue on the chorioallantoic membrane of the chick embryo. (*Kaufman, Prieto, Mason, and Kinney*: May-June) 561*
- Tumors produced by methylcholanthrene in the duck: papilloma, squamous cell carcinoma, and hemangioma. (*Rigdon*: May-June) 558*
- Neoplasm**—Mixed tumors of the skin. (*Morehead*: May-June) 536*
- Testicular tumors in infants. (*Mostofi*: May-June) 536*
- Thymic tumors characterized by lymphangioendothelial structure. (*Hubbell and Liebow*: May-June) 321
- Neotetrazolium as a histochemical index of cell metabolism** in the ovary. (*Foraker and Denham*: May-June) 521*
- Nephrosis**—Chronic glomerulonephritis and nephrotic syndrome induced in rats by N,N'-diacetyl-benzidine. (*Harman, Miller, and Miller*: May-June) 529*
- The effect of inorganic urine phosphate on the development of hemoglobinuric . . . in rabbits. (*Lalich*: May-June) 530*
- Neurilemmoma of the stomach**—an indirect cause of gastric ulceration and fulminating gastro-intestinal hemorrhage. Report of two cases. (*Platt and Eynon*: May-June) 569*
- Nevus**—The comparative morphogenesis of the dermo-epidermal nevi and malignant melanoma. (*Berkheiser and Rappoport*: May-June) 477
- Newt**—Properties of transplantable methylcholanthrene-induced sarcomas in the . . . (*Breedis*: May-June) 560*
- Nocardiosis**. Nocardial osteomyelitis and septicemia. (*Cruz and Clancy*: July-August) 607
- Normal glomerulus and its basic reactions in disease**. (*Rinehart, Farquhar, Jung, and Abul-Haj*: May-June) 537*
- Nuclear changes following irradiation of tumors**. (*Brues*: May-June) 547*
- Obesity**—Familial diabetes mellitus in mice, associated with insulin resistance, . . . , and hyperplasia of the islands of Langerhans. (*Bleisch, Mayer, and Dickie*: May-June) 369
- Observations on exogenous hemochromatosis** apparently due to multiple transfusions. (*Graef, Gordon, Newman, Olivetti, and Klein*: May-June) 538*
- Observations on the Gomori substance in the hypothalamus of dogs and rats** under normal and experimental conditions. (*Laqueur*: May-June) 521*
- Observations on the persistence of hepatic glycogen after death**. (*Morrione and Mamelok*: May-June) 497
- Occurrence and distribution of glycogen in hemangioma, dermatofibrosarcoma protuberans, hemangiopericytoma, and Kaposi's sarcoma**. (*Bangle*: November-December) 1027
- Occurrence in tarred rabbit skin of minor, almost imperceptible, neoplastic changes**. (*Rous and Rogers*: May-June) 558*
- Osteomyelitis**—Nocardiosis. Nocardial . . . and septicemia. (*Cruz and Clancy*: July-August) 607
- Ovary**—Neotetrazolium as a histochemical index of cell metabolism in the . . . (*Foraker and Denham*: May-June) 521*
- Oxyphil parathyroid adenomas**. (*Sommers and Young*: July-August) 673
- P³²**—A histochemical study of irradiated bone. (*Burstone*: November-December) 1133
- Some autoradiographic studies of the distribution of . . . and S³⁵ in mammalian tissues. (*Holt and Warren*: May-June) 556*
- The inhibitory effect of beta radiation (. . .) on fibroplasia in rat skin. (*Lushbaugh and Storer*: May-June) 548*
- Pancreas**—Familial diabetes mellitus in mice, associated with insulin resistance, obesity, and hyperplasia of the islands of Langerhans. (*Bleisch, Mayer, and Dickie*: May-June) 369

- Hepatic and pancreatic changes produced in rats by ethionine and their relation to human lesions. (*Popper, de la Huerga, and Koch-Weser*: May-June) 518*
- Papilloma**—The cytology of skin papillomas that yield virus-like particles. (*Bunting, Strauss, and Banfield*: November-December) 985
- Parabiosis**—Pathologic changes in parabiotic rats after hemi-adrenalectomy and x-radiation. (*Edwards and Sommers*: May-June) 545*
- Parathyroid gland**—Oxyphil parathyroid adenomas. (*Sommers and Young*: July-August) 673
- Pathogenesis of atheroma**. (*McLeitch*: May-June) 413
- Pathogenesis of polyarteritis nodosa** in hypertensive rats. (*Race and Peschel*: May-June) 527*
- Pathologic changes in parabiotic rats after hemi-adrenalectomy and x-radiation**. (*Edwards and Sommers*: May-June) 545*
- Pathologic changes in the gastric mucosa of the rat after histamine administration**. (*Cambel and Sgouris*: November-December) 1079
- Pathologic changes produced in chick embryos by yolk sac inoculation of group A Cocksackie virus**. (*Peers, Ransom, and Huebner*: May-June) 515*
- Pathology of cortisone-enhanced poliomyelitis in the hamster following intracerebral inoculation of strain MEF₁**. (*Aronson and Schwartzman*: May-June) 516*
- Pathology of epidemic hemorrhagic fever**. (*Hullinghorst*: May-June) 517*
- Pathology of meningiomas**. A study of 121 cases. (*Lapresle, Netsky, and Zimmerman*: September-October) 757
- Pathology of the acute radiation syndrome in man**. (*Lisco*: May-June) 540*
- p-dimethyl-amino-azobenzene**—Effect of repeated x-radiation of the whole body on the development of tumors in rats fed . . . (*Hoch-Ligeti*: May-June) 565*
- Penicillin**—Myocarditis, arteritis, and focal hepatic, splenic, and renal granulomas apparently due to . . . sensitivity. (*Waugh*: May-June) 437
- Peptic ulcer**—Incipient adenocarcinoma of the stomach in . . . Report of two cases. (*Yesner*: May-June) 571*
- Phase microscope studies of renal glomeruli**. Glomerular deposits of "hyaline" substances. (*Churg and Grishman*: May-June) 537*
- Phosphate**—The effect of inorganic urine . . . on the development of hemoglobinuric nephrosis in rabbits. (*Lalich*: May-June) 530*
- Pig**—Lesions in swine exposed to total body gamma radiation from an atomic bomb source. (*Tullis, Lamson, and Madden*: May-June) 545*
- Pigment**—Hemoglobin-derived and iron-storage pigments in cells: micro-spectroscopic analysis. (*Mellors*: May-June) 540*
- Iron deposits in the brain compared with similar deposits in spleen, liver, lungs, and other organs, and their relationship to mental diseases and age. (*Strassmann*: May-June) 540*
- Pituitary necrosis in routine necropsies**. (*Plaut*: May-June, 542*; September-October) 883
- Plasma proteins**—An electrophoretic study of the origin of the abnormal . . . in multiple myeloma. (*Miller, Brown, Miller, and Eitelman*: May-June) 560*
- Pneumonia**—Aspiration of gastric contents. An experimental study. (*Teabeaut*: January-February) 51
- Interstitial . . . and focal myocarditis in poliomyelitis. (*Jurow and Dolgopel*: May-June) 566*
- Necrotizing granulomatosis with angiitis and the atypical pneumonitides. (*Fienberg*: May-June) 564*
- Pulmonary fibrosis secondary to . . . (*Auerbach, Mims, and Goodpasture*: January-February) 69
- Poliomyelitis**—Interstitial pneumonia and focal myocarditis in . . . (*Jurow and Dolgopel*: May-June) 566*

- The pathology of cortisone-enhanced . . . in the hamster following intracerebral inoculation of strain MEF₁. (*Aronson and Schwartzman*: May-June) 516*
- Polyarteritis nodosa**—Pathogenesis of . . . in hypertensive rats. (*Race and Peschel*: May-June) 527*
- Polypus**—Inflammatory fibroid polyps of the stomach. (*Helwig and Ranier*: May-June) 535*
- Pontine hemorrhage in intracranial hypertension**. (*Fields and Halpert*: May-June) 541*
- Precipitin test for Bence Jones protein**: report on the serologic tests on urine of 1000 individuals, employing antibody prepared by the adjuvant technic. (*Collier and Jackson*: May-June) 561*
- Pregnancy**—Metaplasia, hyperplasia, and neoplasia in the uterine cervix during (*Reagan, Redding, and Merrill*: May-June) 569*
- Pregnancy effect**—The similarity of the . . . on the epithelium of the maternal and fetal cervix. (*Hellman and Rosenthal*: May-June) 534*
- Primary alveolar cell carcinoma of the lung**. (*Fisher*: May-June) 533*
- Primary osteogenic sarcoma following x-irradiation**. (*Blumberg and Hufner*: May-June) 563*
- Primary systemic amyloidosis** (report of a case associated with bone marrow plasmacytosis, hyperglobulinemia, and pemphigus vulgaris). (*Worken and Wolf*: May-June) 572*
- Probable Hodgkin's disease in a dog**. (*Bloom*: May-June) 534*
- Proceedings**—See American Association of Pathologists and Bacteriologists.
- Properties of transplantable methylcholanthrene-induced sarcomas in the newt**. (*Breedis*: May-June) 560*
- Pulmonary fibrosis secondary to pneumonia**. (*Auerbach, Mims, and Goodpasture*: January-February) 69
- Pulmonary hemorrhage**. Experimental studies. (*Ahvenainen and Call*: March-April) 193
- Pulmonary hemorrhage in infants**. A descriptive study. (*Ahvenainen and Call*: January-February) I
- Purpura**—Morphology of thrombotic thrombocytopenic . . . with demonstration of aneurysms. (*Orbison*: January-February) 129
- Rabbit**—A study of vascular reaction to radiation: rabbit ear chamber technic. (*Moseley, Lushbaugh, and Hale*: May-June) 568*
- Studies on the nature and pathogenesis of muscular degeneration in cortisone-treated rabbits. (*Ellis*: May-June) 542*
- The effect of inorganic urine phosphate on the development of hemoglobinuric nephrosis in rabbits. (*Lalich*: May-June) 530*
- The histology of antigenically stimulated lymph nodes in rabbits given ACTH or cortisone. (*Craig*: July-August) 629
- The occurrence in tarred . . . skin of minor, almost imperceptible, neoplastic changes. (*Rous and Rogers*: May-June) 558*
- Radiation syndrome**—The pathology of the acute . . . in man. (*Lisco*: May-June) 549*
- Rat**—A correlation of morphologic with metabolic changes in . . . skin following exposure to beta (Sr⁹⁰) radiation. (*Lushbaugh and Hale*: May-June) 556*
- Chronic glomerulonephritis and nephrotic syndrome induced in rats by N,N'-diacetyl-benzidine. (*Harman, Miller, and Miller*: May-June) 529*
- Comparative histologic effects of 400 kilovolt and 23 million electron volt x-rays on the long bones of young albino rats. (*Cauldwell and Bennett*: May-June) 547*
- Effect of repeated x-radiation of the whole body on the development of tumors in rats fed *p*-dimethyl-amino-azobenzene. (*Hoch-Ligeti*: May-June) 565*

the rat's left pulmonary artery. (*Ellis, Grindlay, and Edwards:*
January-February) 89
- The dissolution of fatty cysts in precirrhotic and cirrhotic livers of
choline-deficient rats treated with lipotropic factors. (*Hartroft and
Sellers:* May-June) 387
- The effect of aureomycin and terramycin on the x-radiated
(*Furth, Coulter, and Howland:* March-April) 185
- The effect of estrogens on the growth apparatus of the bones of
immature rats. (*Budy, Urist, and McLean:* November-December) 1143
- The inhibitory effect of beta radiation (P^{32}) on fibroplasia in . .
skin. (*Lushbaugh and Storer:* May-June) 548*
- Relation between morphologic and immunologic changes caused by
radiation. (*Dixon and Talmage:* May-June) 554*
- Relation of hemorrhage to hematopoiesis, blood coagulation and mor-
tality after total body x-irradiation. (*Rosenthal:* May-June) . . . 549*
- Resorcinol—Interaction between eastern equine encephalomyelitis virus
and certain . . . derivatives. (*Sanders, Kabara, Soret, and Akin:*
May-June) 515*
- Reticulum pattern in smooth muscle tumors. (*Mulligan:* May-June) . . 535*
- Rôle of arterial injury in the localization of methyl cellulose. (*Waters
and Duff:* May-June) 527*
- S^{35} —Selective uptake of radioactive sulfur by human chondrosarcomas.
(*Gottschalk and Allen:* May-June) 562*
- Some autoradiographic studies of the distribution of P^{32} and . . .
in mammalian tissues. (*Holt and Warren:* May-June) 556*
- Sarcoidosis—The natural history of the lesions in (*Barrie and
Bogoch:* May-June) 541*
- Sarcoidosis and histoplasmosis. (*Iverson and Pinkerton:* May-June) . . 542*
- Sarcoma—Anitschkow cell . . . of the heart. (*Mainwaring and Ayres:*
September-October) 823
- Primary osteogenic . . . following x-irradiation. (*Blumberg and
Hufner:* May-June) 563*

- Scoliosis and dissecting aneurysm of the aorta in rats fed with *Lathyrus odoratus* seeds.** (*Ponseli and Baird*: November-December) 1059
- Selective uptake of radioactive sulfur by human chondrosarcomas.** (*Gottschalk and Allen*: May-June) 562*
- Serum sickness**—The mechanism of action of cortisone on experimental 565*
 (*Germuth*: May-June)
- Shock disease in captive wild mammals.** (*Christian and Ratcliffe*: July-August) 725
- Sickle cell**—The structural basis of sickling and its electron microscopy. (*Rebuck, Monto, and Sturrock*: May-June) 530*
- Similarity of the pregnancy effect on the epithelium of the maternal and fetal cervix.** (*Hellman and Rosenthal*: May-June) 534*
- Skeletal development and degenerative joint disease in mice treated with radioactive iodine (I^{131}).** (*Silberberg and Silberberg*: May-June) 569*
- Skin**—A correlation of morphologic with metabolic changes in rat . . . following exposure to beta (Sr^{90}) radiation. (*Lushbaugh and Hale*: May-June) 556*
- Clear cell myo-epithelioma of the Report of ten cases. (*Lever and Castleman*: July-August) 691
- Mixed tumors of the (*Morehead*: May-June) 536*
- The cytology of . . . papillomas that yield virus-like particles. (*Bunting, Strauss, and Banfield*: November-December) 985
- The effect of beta rays on the . . . as a function of the energy, intensity, and duration of radiation. (*Moritz and Henriques*: May-June) 567*
- Some autoradiographic studies of the distribution of P^{32} and S^{35} in mammalian tissues.** (*Holt and Warren*: May-June) 556*
- Some effects of concentrated aqueous extracts of malignant tumors on cancer patients.** (*Weiss*: May-June) 571*
- Some similarities of action between ionizing radiation and sulfhydryl enzyme inhibition in vivo.** (*Hicks*: May-June) 544*
- Spleen**—Hamartoma of the A report of four cases. (*Coe and Von Drashek*: July-August) 663
- Myocarditis, arteritis, and focal hepatic, splenic, and renal granulomas apparently due to penicillin sensitivity. (*Waugh*: May-June) 437
- Spleen in hypersplenism.** (*Leffler*: March-April) 303
- Splenomegaly and Kurloff cell hyperplasia in guinea-pigs treated with stilbestrol.** (*Nadel*: May-June) 568*
- Spontaneous demyelinating disease of adult rats.** (*Pappenheimer*: May-June) 347
- Squamous cell**—Morphology of the malignant A study of six thousand cells derived from . . . carcinomas of the uterine cervix. (*Reagan and Moore*: January-February) 105
- Sr^{90}** —A correlation of morphologic with metabolic changes in rat skin following exposure to beta (. . .) radiation. (*Lushbaugh and Hale*: May-June) 556*
- Stilbestrol**—Splenomegaly and Kurloff cell hyperplasia in guinea-pigs treated with (*Nadel*: May-June) 568*
- Stomach**—Histology of the exteriorized gastric mucosa of the rat. (*Stevens and Toovey*: May-June) 570*
- Incipient adenocarcinoma of the . . . in peptic ulcer. Report of two cases. (*Vesner*: May-June) 571*
- Inflammatory fibroid polyps of the (*Helwig and Ranier*: May-June) 535*
- Neurilemmoma of the . . . —an indirect cause of gastric ulceration and fulminating gastro-intestinal hemorrhage. Report of two cases. (*Platt and Eynon*: May-June) 569*
- Pathologic changes in the gastric mucosa of the rat after histamine administration. (*Cambel and Sgouris*: November-December) 1079
- Structural alterations within the aortic intima in infancy and childhood.** (*Prior and Jones*: May-June, 524*; September-October) 937

- Structural basis of sickling and its electron microscopy. (*Rebuck, Monto, and Sturrock*: May-June) 530*
- Studies of the clotting defect in dogs following total body irradiation. (*Penick*: May-June) 550*
- Studies on the nature and pathogenesis of muscular degeneration in cortisone-treated rabbits. (*Ellis*: May-June) 542*
- Studies on the pathogenesis of glomerulonephritis. (*Hopps, Kelly, and Engles*: May-June) 529*
- Studies on the reduction of tetrazolium derivatives (TD) by normal and diseased human tissues. (*Hsu and Hoch-Ligeti*: May-June) 520*
- Study of glioblastoma by the Golgi method. (*Klatzo*: May-June) 357
- Study of vascular reaction to radiation: rabbit ear chamber technic. (*Moseley, Lushbaugh, and Hale*: May-June) 568*
- Sulfhydryl enzyme—Some similarities of action between ionizing radiation and . . . inhibition *in vivo*. (*Hicks*: May-June) 544*
- Survival of human tumor tissue on the chorioallantoic membrane of the chick embryo. (*Kaufman, Prieto, Mason, and Kinney*: May-June) 561*
- Symposium on the pathologic aspects of reactions to ionizing radiation. 543*
- Tar—The occurrence in tarred rabbit skin of minor, almost imperceptible, neoplastic changes. (*Rous and Rogers*: May-June) 558*
- Technic—Frozen sectioning. A new and rapid method. (*Bash and Hewitt*: September-October) 863
- Terramycin—The effect of aureomycin and . . . on the x-irradiated rat. (*Furth, Coulter, and Howland*: March-April) 185
- Therapy of the x-irradiation syndrome with . . . (*Coulter, Furth, and Howland*: September-October) 875
- Testicular tumors in infants. (*Mostofi*: May-June) 536*
- Testis—Factors concerned in the development of experimental testicular tumors in rats. (*Biskind, Bernstein, and Biskind*: May-June) 559*
- Tetrazolium—Studies on the reduction of . . . derivatives (TD) by normal and diseased human tissues. (*Hsu and Hoch-Ligeti*: May-June) 520*
- Therapy of the x-irradiation syndrome with terramycin. (*Coulter, Furth, and Howland*: September-October) 875
- Thrombocytopenia—Morphology of thrombotic thrombocytopenic purpura with demonstration of aneurysms. (*Orbison*: January-February) 129
- Thymic tumors characterized by lymphangioendothelial structure. (*Hubbell and Liebow*: May-June) 321
- Thyroid gland—Histologic effects of therapeutic doses of radioactive iodine on the . . . of man. (*Vickery*: May-June) 552*
- Tissue extracts—Effects of . . . and of protein-split products upon leukocytes and upon capillary permeability. (*Tershakovec and Moon*: May-June) 522*
- Toxoplasmosis—Effects of total body radiation on a chronic, latent infection in which immunity is not dependent on the spleen (. . .). (*Frenkel, Jacobs, and Mellon*: May-June) 555*
- Transfusion—Observations on exogenous hemochromatosis apparently due to multiple transfusions. (*Graef, Gordon, Newman, Olivetti, and Klein*: May-June) 538*
- Transpulmonary passage of tumor cell emboli. (*Zeidman and Buss*: May-June) 533*
- Trichinella—Effects of x-ray on trichina larvae. (*Gould*: May-June) 554*
- Tuberculosis—The hemagglutination test in pulmonary . . . (*Cruikshank and Wicks*: May-June) 564*
- Tuberculous lesions of the circulatory system. Report of two cases. (*Neumann*: September-October) 919
- Tumor cell emboli—Transpulmonary passage of . . . (*Zeidman and Buss*: May-June) 533*

- Tumor immunity**—Loss of tumor-immune activity from serum following exposure to injured lymphoid cells. (*Stoerk*: May-June) 532*
- Tumor transplantation**—Immunity to tumors transplanted in the brain of heterologous hosts. (*Eichwald, Rambo, and Henry*: May-June) 557*
- Natural resistance and acquired immunity to tumors transplanted to the anterior chamber of homologous hosts. (*Eichwald, Chang, and Hattori*: May-June) 557*
- The survival of human tumor tissue on the chorioallantoic membrane of the chick embryo. (*Kaufman, Prieto, Mason and Kinney*: May-June) 561*
- Tumors produced by methylcholanthrene** in the duck: papilloma, squamous cell carcinoma, and hemangioma. (*Rigdon*: May-June) 558*
- Ultra-violet microscopy**—Cellular changes after ionizing radiation: histochemical study and (*Sommers, Holt, and Warren*: May-June) 543*
- "Untreated" bronchogenic carcinoma**. A report of thirty-five cases. (*Tanner and Gordon*: May-June, 536*; September-October) 953
- Unusual pathologic manifestations of dissecting aortic aneurysm**, including one example of so-called incomplete rupture. (*Hunter and Lium*: November-December) 1035
- Urate calculi**—Further studies on the pathogenesis of . . . in the urinary tract of white rats. (*Ungar and Ungar*: March-April) 291
- Uterus**—The histogenesis of malignant mixed tumors of Müllerian origin (mixed mesodermal tumor of the . . .). (*Clark, Sternberg, and Smith*: May-June) 563*
- Varicella**—Myocarditis in association with (*Hackel*: May-June) 516*
- Veins**—Endophlebohypertrophy and phlebosclerosis. II. The external and common iliac (*Lev and Saphir*: May-June) 401
- Virus**—Interaction between eastern equine encephalomyelitis . . . and certain resorcinol derivatives. (*Sanders, Kabara, Soret, and Akin*: May-June) 515*
- Myocarditis in association with varicella. (*Hackel*: May-June) 516*
- The cytology of skin papillomas that yield . . .-like particles. (*Bunting, Strauss, and Banfield*: November-December) 985
- The effect of x-rays on the . . .-host cell relationship. (*Cheever*: May-June) 553*
- The histopathology of Coxsackie . . . infection in mice. II. Histochemical observations on the lesions in muscle and fat. (*Godman, Bunting, and Melnick*: July-August) 583
- The pathologic changes produced in chick embryos by yolk sac inoculation of group A Coxsackie (*Peers, Ransom, and Huebner*: May-June) 515*
- The pathology of cortisone-enhanced poliomyelitis in the hamster following intracerebral inoculation of strain MEF₁. (*Aronson and Schwartzman*: May-June) 516*
- X-ray absorption**—The determination of the mass of histologic structures by (*Fitzgerald, Beyer, Williams, and Sherman*: May-June) 533*
- X-ray diffraction**—The application of . . . in pathology (with particular reference to pulmonary graphitosis). (*MacMahon*: May-June) 531*
- X-rays**—A study of vascular reaction to radiation: rabbit ear chamber technic. (*Moseley, Lushbaugh, and Hale*: May-June) 568*
- Comparative histologic effects of 400 kilovolt and 23 million electron volt x-rays on the long bones of young albino rats. (*Cauldwell and Bennett*: May-June) 547*
- Effect of repeated x-radiation of the whole body on the development of tumors in rats fed *p*-dimethyl-amino-azobenzene. (*Hoch-Ligeti*: May-June) 565*

INDEX OF SUBJECTS

1193

- Effects of x-ray on trichina larvae. (*Gould: May-June*) . . . 554*
- Pathologic changes in parabiotic rats after hemi-adrenalectomy and x-radiation. (*Edwards and Sommers: May-June*) . . . 545*
- Primary osteogenic sarcoma following x-irradiation. (*Blumberg and Hufner: May-June*) . . . 563*
- Relation of hemorrhage to hematopoiesis, blood coagulation and mortality after total body x-irradiation. (*Rosenthal: May-June*) 549*
- The effect of whole body x-radiation upon cell division in radio-sensitive and radioresistant tissues. (*Williams, deLong, and Jaffe: May-June*) . . . 546*
- The effect of . . . on the virus-host cell relationship. (*Cheever: May-June*) . . . 553*
- Therapy of the x-irradiation syndrome with terramycin. (*Coulter, Furth and Howland: September-October*) . . . 875
